

Dear customer,

CC Höganäs Byggkeramik AB one of the leading producers of ceramic tiles and mortars, specialised for industrial floors and epoxy mortars for food industry and other heavy loaded industrial floors, has a pleasure to inform you that PEDING Sp.zo.o. is official and authorised representative for Serbian and Montenegro market since 23.09.2005.

The region of south east Europe has since several decades been one of our strongest and most reliable markets of all. We have always been active on the market with someone to represent us and done our best to follow-up the request that have been on the market. However even if we from time to time have made some deliveries also last 10 to 15 years this region has been under a very strong pressure and the investments has been at a very low level.

Now we all expect that this time is in the past and that we now can see some good new spirit growing. Therefore is it a very great pleasure to again be present with a company representing us that has a long and reliable connection with CC Höganäs Building Ceramics. F:a PEDING that with an office in Belgrade will be serving you as our representative in the region of Serbia has a long and reliable relation with CC Höganäs.

F:a PEDING is also very skilled in floor constructions and installation of tiles in particularly food industry and has experience since more than 15 years of this kind of installations so it is with great confidence we can recommend F:a PEDING to assist you in any matter concerning our products.

Looking forward to co-operate with you now and in the future.

Best regards

CC Höganäs Byggkeramik AB
