

Standard section

Standard section, designation 024/76

Material

Cover grating of rigid PVC (Polypropylene-Copolymer). UV-stabilizer is added to give resistance against UV-light. The material has limited durability against frost and must not be used at temperature below -10°C . Impact resistance decreases from 0°C .

Specification

Normal standard width is 295 mm. Other widths (between 100 - 400 mm) are offered on request. Length = 410 mm, to connect at place. Corner section consists of two unit with 45° angle. Cover grating with radius can be offered.

Colour

White, stone or grey.

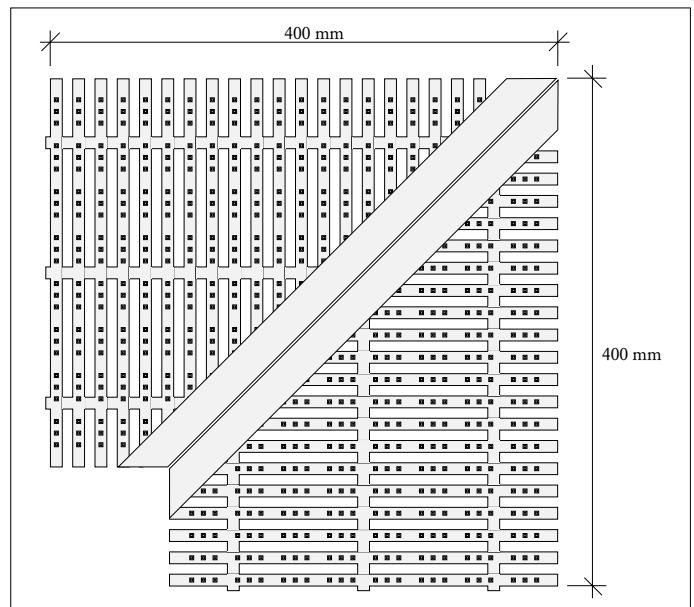

Time of delivery

Normally not in stock. Produced after order. Deliverytime is approx. 7 weeks after order.

Maintenance instruction

During the winter and when the pool is not used, the cover grating ought to be kept indoors to avoid unnecessary UV-exposure.
